Participants and Customers

How MTA collect personal data:

MTA customers and participants supply their personal data when signing up for classes through our registration form either via the website, or via paper form.

This is either completed by a parent/guardian or the child themselves if they deemed able to do so.

Personal data may also come to us unsolicited via enquiries through our website and to our generic email account.

Why MTA collect personal data:

To attend any of MTA's activities participants/parents/guardians must agree to some processing of their personal data. This is due to Legitimate Interests – GDPR Article 6(1)(f), Legal Obligation GDPR Article 6(1)(c), Contract - Article 6(1)(b) and/or Consent - Article 6(1)(a).

Should MTA be unable to process participant's data, we would be contravening both our Health & Safety and Child Safeguarding policies. We would also be ignoring best practice regarding working with children/vulnerable adults.

Our participants must remain safe at all times, therefore information about participants must be collected in order to create registers and accurate student records. This information is also used to provide students with appropriate classes, including dividing students into age groups.

Special category data is only collected with the consent of the data subject. Special category data MTA collects includes but is not limited to: Medical/Disability information, Income information, Ethnicity, Gender and Sexuality.

As physical activity providers it is essential that this consent is given should a participant have any medical/disability needs. This allows us to incorporate participants safely into classes. It is also used in assessing if we can incorporate participants safely into classes.

Income information is only collected in instances where a participant applies to attend our classes at a concessionary price, or on a bursary. This financial support is means tested, and therefore is subject to documented proof. Proofs of entitlement to concession are shredded after the entitlement has been noted.

Ethnicity and other sensitive data is to provide information to funding bodies for statistical purposes. This data is always provided to third-parties as quantified data (i.e. cumulative numerical data only with no identifying information relating to any data subject).
